

What is a cookie?

A cookie is a small file of letters and numbers that are downloaded and stored on the browser or hard drive of devices or computers that you use to access the website. Your browser makes these cookies available every time you visit our website so that we can distinguish you from other users. These cookies help us to provide you with a good browsing experience on our website and also help us to improve our website.

Why do we use cookies?

We may use cookies for the following reasons:

Essential Cookies – these are cookies that are necessary for the operation of our website. Examples of the function of essential cookies are:

- session cookies which enable you to navigate through our website smoothly.
- cookies to help position information on a PC, tablet, smartphone or other screen.
- cookies to enable you to log into a secure area of our website.

Functional Cookies – these are used to recognise you when you visit our website and enable us to personalise your preferences (such as territory and language).

Analytical Cookies – These enable us to recognise and count the number of visitors to our website. They also help us to see how visitors move around our website. These cookies are used to help us improve how the website and its pages work.

Google Analytics – We also use Google Analytics, this is a web analysis services offered by Google Inc. (“Google”). Google Analytics uses a series of cookies which enable your use of our website to be analysed by collecting anonymous data such as where you have come from, how long you spend on our website and which pages you visit. Google stores this data and uses it to create reports. Your personal data is not stored by these cookies.

The information generated by Google’s cookies about your use of our website (and this may include your IP address) may be transmitted and stored by Google on servers in the United States. Google may use this information for the purpose of evaluating your use of our website, compiling reports on website activity and Internet usage. Google may also transfer information to third parties where required to do so by law, or where such third parties process the information on Google’s behalf. Google will not associate your IP address with any other data held by Google. By adjusting your browser settings you can prevent storage of such cookies. You may also prevent the recording of data generated by the cookies by Google and the processing of such data by Google by downloading and installing the browser plugin and selecting your country.

How to control/delete cookies?

Your browser should allow you to see what cookies are on your device and to enable you to delete them either individually or all together. Information on the cookies we use and how you can control or delete these is available at [**All About Cookies**](#).

Please note that by deleting or disabling cookies you may not be able to use certain functions or to access certain areas on our website.

If you would like more information regarding our Cookies Policy, please [**contact us**](#).
